

Shon Little, PSM, PSPO

Software Engineering Leader | AI Solution Builder

shon@shonlittle.com | 310-890-5753 | Los Angeles, CA | <https://www.linkedin.com/in/shonlittle/>

PROFESSIONAL SUMMARY

Engineering leader with 20+ years of experience driving AI-powered software innovation, leading high-performing teams, and delivering enterprise-grade, scalable solutions. Adept at aligning technology, automation, and data-driven insights with business objectives while managing complex stakeholder requirements. Proven ability to build and mentor technical teams, optimize software development lifecycles, and execute strategic initiatives that enhance operational efficiency and digital transformation.

- Full-Stack Development
- Microservices Architecture
- Cloud Computing (AWS, GCP, Azure)
- CI/CD (GitHub Actions, CircleCI)
- AI & ML Integration
- Software Architecture
- Version Control (Git, GitHub)
- Technical Roadmap & Strategy
- Docker & Kubernetes
- System Scalability
- Distributed Systems
- Backend Development (Python, Node)
- Frontend Development (HTML, CSS, MUI)
- Python (Django, FastAPI, Flask)
- Data Engineering (SQL)
- Client Engagement
- Databases (PostgreSQL, MongoDB)
- API Development (REST, GraphQL)
- Authentication (OAuth, JWT)
- JavaScript/Typescript (React, Node)
- Agile & Scrum Methodologies
- .NET (C#, ASP.NET)
- Business Intelligence (Alteryx)
- Team Leadership

PROFESSIONAL EXPERIENCE

Senior Software Engineering Manager

BCG X

Los Angeles, CA, (Hybrid); 07/2021 - 02/2025

Promoted by Boston Consulting Group to drive AI-powered software engineering initiatives within BCG X, overseeing enterprise-scale projects, technical strategy, and global team leadership.

- **Led software engineering initiatives for custom AI, data, and digital client solutions**, ensuring scalable, high-impact enterprise applications.
- **Managed a globally distributed team of 7 engineers** and mentored **8 career development reports**, fostering technical growth and high performance.
- **Drove hiring and talent acquisition efforts**, evaluating and securing **top engineering talent** across **U.S. and offshore teams** to enhance delivery capability.
- **Architected technology roadmaps and execution plans**, optimizing scope, timelines, and budgets **for projects exceeding \$30M** while ensuring alignment with business priorities.
- **Spearheaded client engagement**, collaborating with **business and technical stakeholders** to define project objectives, address pain points, and deliver impactful software solutions.
- **Elevated engineering quality standards**, implementing **code review best practices, testing frameworks, and integration processes** to drive efficiency.
- **Served as the most tenured software engineering leader in North America**, providing **strategic technical guidance and thought leadership** for BCG X's delivery teams.

Select Achievements:

- **Eliminated delays and manual errors** for a **meat-packing client** by developing a **real-time defect logging system**, reducing processing time and boosting operational efficiency.
 - **Expanded business potential** by integrating the **real-time defect logging system** into **BCG's flagship Manufacturing AI suite**, broadening its market impact.
- **Appointed Prototyping Global Topic Lead and North American Squad Lead**, becoming the **go-to SME for MVP development** and software engineering across the U.S.

PROFESSIONAL EXPERIENCE CONTINUED

Lead Software Engineer

BCG

Los Angeles, CA, (Hybrid); 09/2011 - 07/2021

Promoted by Boston Consulting Group to develop and scale **custom AI-driven software solutions** for enterprise clients within BCG Gamma, leading technical innovation, mentoring engineers, and optimizing business-critical applications.

- **Designed and developed enterprise-grade applications** from the ground up, leveraging **AI, data science, and automation** to drive operational efficiency and **cost reduction** for Fortune 500 clients.
- **Managed and mentored a team of up to 6 engineers**, providing **technical leadership, hands-on training, and career coaching** to strengthen team performance and client engagement.
- **Engineered data-driven applications**, integrating **advanced algorithms and predictive analytics** to enhance **business intelligence, workflow automation, and decision-making**.
- **Scaled flagship software solutions** to serve broader market demand, transforming **custom-built client applications** into **revenue-generating proprietary products**.
- **Led Agile software development efforts**, balancing multiple concurrent projects while optimizing software delivery pipelines for efficiency and rapid iteration.
- **Collaborated with third-party vendors**, ensuring compliance with **technical, budgetary, and quality standards** throughout the software development lifecycle.

Select Achievements:

- **Developed and scaled MVP for airline industry**, leveraging **optimization algorithms** to **reroute flights** during major disruptions, minimizing revenue loss and passenger impact.
 - Airline tool adopted across the airline sector, ensuring **real-time operational efficiency** and business continuity.
 - **Recipient of BCG's Innovator Award (2018)** for groundbreaking contributions to software development.
- **Built an AI-powered patent analytics tool**, enabling companies to **identify high-value innovation opportunities**, later commercialized as a **BCG flagship product**.
- **Streamlined enterprise restructuring** by designing an **organizational chart automation tool**, drastically reducing manual effort in sorting and visualizing **complex employee hierarchies**.
- **Revamped auto parts inventory management**, developing a **real-time tracking system** that automatically identified **stock shortages and surpluses**, leading to **optimized procurement and cost savings of \$14M annually**.
- **Enabled \$100M cost reductions** by creating an **interactive contract spend visualization tool**, helping clients pinpoint inefficiencies and renegotiate vendor agreements.

CERTIFICATIONS

Professional Scrum Product Owner (PSPO) - Scrum.org, 03/2023

Professional Scrum Master (PSM) - Scrum.org, 06/2022
